## Green Makeover waste and sustainability audits

February 2009

Green Makeover specialises in waste audits and waste minimisation programs for government agencies, business and other organisations. Green Makeover is operated by Stuart McQuire who helped to develop the Waste Wise program in Victoria and has extensive experience working on green office programs with a diverse range of organisations. Stuart McQuire has formal qualifications as an Environmental Scientist (Masters Environmental Science) and Statistician (Bachelor Science).

Green Makeover offers the following audits and assessments:

**FRD24C waste audits**, designed to inform FRD24C\*\* reporting, includes a weight based audit of landfill, recycling (including co-mingled material and secure document bins) and compost streams. Also includes a visual inspection of waste streams to identify contamination and waste minimisation opportunities. The results are collated in a written report including calculation of landfill per year and per FTE, calculation of the recycling rate, calculation of greenhouse gas emissions associated with waste disposal, and highlighting of any contamination issues, priced from \$295\*.

**Recycling check up**, includes a visual waste assessment, advice on bin selection, placement & signage, advice on recycling collections & services (including costs), collated in a written report, priced from \$295\*.

**Detailed waste audits**, includes a detailed weight based waste audit (ie including sorting and weighing of materials in each waste stream), results presented as KPI's (including FRD24C), advice on bin selection, placement & signage, advice on recycling collections & services (including costs), collated in a written report, priced from \$495\*.

**Sustainability audits**, tailored to suit the organisation's requirements. Detailed assessment of energy, greenhouse, transport, waste & water. Green Makeover can engage specialist energy and water auditors. Benchmarking of the current situation, establishment of key performance indicators and targets. Recommendations and costings on key improvements for sustainability. Green Makeover can quote according to the organisation's requirements.

In 2007 and 2008 clients included:

- County Court,
- Department of Human Services,
- Department of Justice,
- Brimbank City Council, and
- VicRoads.

\*Note that audits can be done in regional Victoria as well as metropolitan Melbourne. Pricing above excludes distance charges. Discounts can be obtained for regional areas when multiple sites are audited within one organisation or across a number of organisations. Pricing for audits also varies depending on the size of the audits and scope of the audits.

\*\*FRD24C refers to the Department of Treasury and Finance's Financial Reporting Directive (FRD24), which requires Victorian Government departments to report against specific waste and recycling indicators.
